Algorithm

Step1:START

Step 8: Declare array [5]

Step 3: Read array elements

3.1: for (1nd i=0) i<5; i++)

Scanp(4.1. d1, arrayti)

Step 4 : Display array elements

for (int 1=0; 12531+1)

printe("ol.d/n", *array+i)

Step 5: STOP.

alowchard ?

Declare array [5]

Read array elements

for lint 1=0,1 <5; it

Scanf (4).dv, woray \$+1)

Display array elements

for Lind 1=0; 1 < 5; 1+4

print+ ("vod",\n", *array+1)

STOP.
